NOTES FROM THE ARCHIVE

COLUMN 1

Every document begins as a page.

A page can contain several columns.

Headings may be larger than body text.

Some printed lines are very short.

Others extend across a wider region.

Spacing helps readers follow ideas.

A scan preserves the visible marks.

It may also contain dust or borders.

Finding a line is a geometric task.

Reading its words is a separate task.

This example contains no real records.

It was authored for the lesson.
